SAFEGUARD your family's health enjoy the clean, clear taste of MICROLENE purified water

## MICROLENE water purifier

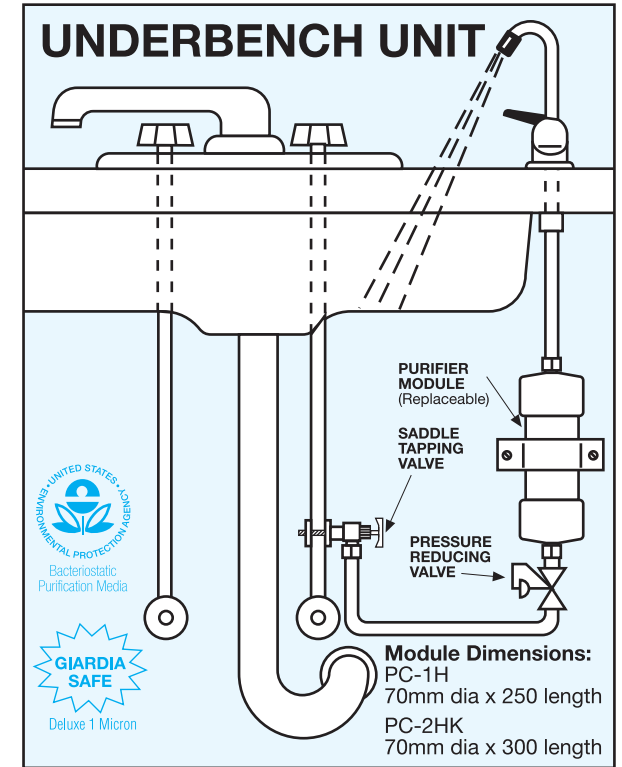

Normal family water use is 4 - 8,000 litres per year.

The MICROLENE counter top connector fits all standard threaded fitting kitchen taps and a special adaptor fitting can be supplied for non threaded taps.

Also available in the MICROLENE range are "in line" purifiers suitable for domestic ice makers and water coolers, plus an underbench unit complete with touchtype separate dispensing faucet.

# MICROLENE water purifier

### UNDERBENCH UNITS

Underbench (Budget)	UBPC-1H-10 (GAC)	10,000 Litres
Underbench (Deluxe)	UBPC-1H-1 (GAC)	10,000 Litres
Underbench (Budget)	UBPC-2HK-10 (KDF/GAC)	30,000 Litres
Underbench (Deluxe)	UBPC-2HK-1 (KDF/GAC)	30,000 Litres

### INSTRUCTIONS

1. Drill a 7/16" or 11mm clearance hole for mounting faucet.
2. Install faucet.
3. Shut off cold water supply.
4. Install saddle tapping valve (as per instructions on package)
5. Install purifier module and plastic tubing as illustrated. Securely mount purifier to inside cupboard wall with enclosed U-clamp and screw.
6. Turn on water valves; run 40 litres of water through the unit to activate the purifier. Check for leaks; re-tighten as necessary.

**WARRANTY:** Your MICROLENE Water Purifier is guaranteed against defective materials and workmanship.

REMEMBER... ONLY MICROLENE HAS BEEN TESTED & PASSED BY THE WORLDS LEADING AUTHORITES

- ✓ REMOVES CHEMICALS
- ✓ REMOVES METALS
- ✓ GIARDIA SAFE
- ✓ ASBESTOS SAFE — BUT DOES NOT STRIP BENEFICIAL MINERALS

# Dear Consumer,

Why have thousands of people all over New Zealand switched to **MICROLENE WATER?**

**BECAUSE** many water supplies in New Zealand contain CHLORINE and ALUMINIUM dissolved – Researchers report that carcinogenic chlorination by-products cause a significant number of rectal and bladder cancers each year – Recent studies show that exposure to ALUMINIUM in drinking water may increase an individual's chances of developing ALZHEIMER'S DISEASE.

**BECAUSE** many water supplies in New Zealand are carried by pipes made of ASBESTOS.

## **BECAUSE MICROLENE PURIFIED WATER:**

- ★ Is PURIFIED WATER at the touch of a button in your kitchen, with all the beneficial minerals and trace elements retained.
- ★ Is safe from CHLORINE, PESTICIDES, SULPHUR, SEDIMENT, RUST, ALGAE, BAD ODOURS; ALUMINIUM and LEAD (KDF units); *Giardia* and *Cryptosporidium* cysts and ASBESTOS (Deluxe 1 Micron units.)
- ★ Removes the concerns about Waikato water.
- ★ ENHANCES the taste of cooking, tea, coffee, cordials, alcoholic beverages and DRINKING WATER.
- ★ Improves the BODY'S METABOLIC activities - digestion, bowel function.
- ★ Is a must for PEOPLE ALLERGIC TO CHLORINE.
- ★ Is excellent for ATHLETES and people in rigorous sports (squash, tennis, rugby, aerobics, bodybuilding etc.)
- ★ CHLORINE FREE water may help prevent hardening of arteries, (which can lead to heart attacks/strokes.)
- ★ **SLIMMERS!!** protects the SKIN from sagging that usually follows weight loss. Shrinking cells are buoyed by water which plumps the skin and leaves it CLEAR, HEALTHY, RESILIENT.

★ ★ ★ SAFE ★ ★ ★  
**ONLY MICROLENE HAS BEEN TESTED/  
PASSED/REGISTERED/LISTED BY THE WORLDS  
LEADING AUTHORITIES AND REGULATORY BODIES**

### **BACTERIOSTATIC Purification Media**

Granular Activated Carbon (GAC)  
Environmental Protection Agency  
of U.S.A. Reg No: 37589

Acceptably hygienic - no need to backwash unless a blockage occurs. End of useful life indicated by chlorine taste or flow reduction.

### **GIARDIA SAFE AND ASBESTOS SAFE**

Deluxe models of MICROLENE Purifiers come with 1 Micron Filtration to ensure total protection against: CYSTS such as *Giardia* and *Cryptosporidium* - and for removal of dangerous ASBESTOS fibres which are very common in NZ town water supply pipes (made of Asbestos). 1 micron filtration tested by Massey University. Note: Budget models of MICROLENE Purifiers come with 10 micron Filtration - NOT *Giardia* Safe.

### **KDF Purification media -**

Listed by National Sanitation Foundation  
Standard 61 - drinking water component

NORMALLY FOR USE ON MUNICIPALLY TREATED WATER TO REMOVE CHLORINE, CHEMICALS, TASTES and ODOURS, METALS (KDF units), *Giardia* cysts and ASBESTOS fibres (Deluxe 1 micron units).

Note: Pre-filtration may be advisable on silty town supply water.

You can use these units on untreated water, but please note: THESE UNITS CANNOT DISINFECT. For advice on appropriate treatment for rural and untreated water supplies - contact your nearest MICROLENE agent - we have systems for removal of Nitrates, Iron, Manganese - we have Water Softeners, Ultra-violet Water Sterilisers, Sand Filters, Neutralising Filters and many other types of water treatment equipment - from whole town size on down to single dwellings.

## **MODELS AVAILABLE**

Nominal Life
